PROJECTS

TexDesigner Marketplace | Full-stack B2B textile design e-commerce platform | texdesigner.com

React 19, TypeScript, Node.js, Express.js, MongoDB, Razorpay, Cloudinary, Vercel, Render

• Built and deployed a full-stack marketplace with Admin, Seller and Customer roles, secured by JWT-based role-based access control.

• Integrated Razorpay with server-side order creation, signature verification and webhooks for secure UPI, GPay, card and NetBanking payments.

• Implemented seller payout and settlement workflows with cumulative wallet accounting, payout history and CSV export for financial reconciliation.

• Delivered IP-protected digital assets using watermarking, Cloudinary CDN and purchase-restricted high-resolution downloads.

• Developed design management, multi-license pricing, search and filtering, cart, wishlist, inventory, offers, analytics, support tickets and feedback features.

Disease Prediction Using Machine Learning | Python

• Built a system that predicts diseases from user-provided symptoms. • Provided ML-based advice and supported online consultation with expert doctors.

E-Commerce Website | Web development, product and order management

• Managed product listings, product information and inventory, and handled daily website updates. • Tracked customer orders and supported efficient order processing and a smooth user experience.
